

SONICLEAR[®] Court Recorder 7

Digital
Recording
Software for
21st Century
Court Reporting

Court Recorder software makes it easy to record legal proceedings with digital accuracy and clarity.

Cost-Effective Digital Recording

Easily convert from cassettes to advanced digital recording software:

- ▶ Professional audio quality for greater detail
- ▶ Fast note taking for marking events in recordings
- ▶ Send over network or Internet for transcription
- ▶ Readbacks are fast and easy
- ▶ As easy as a tape recorder to use
- ▶ No cassettes to juggle

Court Reporting

Court Recorder makes it easy for court reporters to switch to computer-based recording. ClearScribe is ideal as a backup recorder for all types of reporting jobs. Annotations can be entered to mark events for transcribing. Clients are pleased by the fact that there are no interruptions for switching tapes. Transcription work is sped up because of enhanced audio quality, and audio files can be sent over the Internet. Court Recorder also supports voice writer court reporting. Readbacks are exceptionally easy, and the stenomask channel can be played and processed separately from the room microphones.

Courts and Administrative Hearings

Court Recorder incorporates all of the advanced features required by court reporters, while retaining the simplicity of operation of a conventional tape recorder. This makes it suitable for use in situations where court reporters are not available. Court Recorder enables a court clerk, hearing officer, or judge to perform many of the important functions of a court reporter, ensuring an accurate record of events for later review and for appeals.
