

Digital
Recording
Software for
21st Century
Business

Improve sales and increase customer satisfaction by digitally recording meetings, conferences, presentations and training sessions.

Save Time Every Day

Record and document important spoken information using your Windows computer:

- ▶ Convenient, no juggling of cassette tapes
- ▶ Easy to use, just like a traditional tape recorder
- ▶ Hear even the softest voice with clear, digital audio
- ▶ Take notes that are saved with the recorded audio
- ▶ Reconstruct discussions from recordings quickly
- ▶ Record entire meeting without stopping, up to 12 hours
- ▶ Save on CD or post MP3 audio on websites
- ▶ Ideal for creating PowerPoint® audio tracks and Podcasts

Easy Note Taking

It takes just a few clicks to turn spoken information into a valuable resource for improving communication and satisfying customer needs. While recording, you can enter timestamped notes, highlighting sections of meetings and presentations. Anytime you want to review important information, it is available on your computer, indexed and easy to locate.

PowerPoint Tracks and Podcasting

Use SalesVoice to create professional-quality voice tracks for your PowerPoint presentations and Podcasts. Automatic VoiceBoost signal processing produces tracks that sound like they were made in a recording studio. The WAV and MP3 files produced by SalesVoice can be imported directly into PowerPoint, posted to websites, or used for Podcasting.

Affordable Software Solution

SoniClear SalesVoice is the convenient and affordable tool for improving sales results. Equip the entire sales staff to multiply the benefits of SalesVoice for the entire organization.
