Provides Professional Quality Audio
Accepts Any Type of Line Level Input
Kit of Cables for Any Type of PA System
Connects to Computer USB Port

Professional Sound System Connection

With the SoniClear Sound System Interface Kit you can quickly and easily connect any sound system to your computer for professional-quality recordings.

Recording from a sound system requires special hardware to get the best results. The Sound System Interface Kit includes the audio equipment and cables for connecting a sound system to the USB input of the computer.

The included audio interface unit can be combined with the appropriate cable to properly convert the audio signal for recording on the computer.

Connections to the sound system include:

- RCA
- Mini Plug
- XLR
- Balanced 1/4"

The Sound System Interface Kit also includes free technical support for assistance with installation. No technical expertise is required.

Part Number: USBINT

Includes cables to connect to any sound system
