**New SoniClear Digital Recording Software
Targets Government, Business, and Court Reporting**

Pasadena, CA—June 14, 2005 – The SoniClear digital recording product line has been redesigned with five new versions specifically for government, business, and court reporting. Based on feedback from customers of the SoniClear Release 4 MeetingPro products, features have been refined and recombined to provide easy and affordable digital recording.

The three new SoniClear Gov products are tailored to the needs of local, state and federal government. The products can be used together in any combination to provide the optimal combination of features and cost, easily providing scalability from just a single user, separate departments, or the entire organization.

SoniClear Enterprise provides an affordable way for businesses to record meetings and presentations, and conveniently publish the audio on CD. With the SoniClear Enterprise software and a laptop computer, sales meetings, conferences and training events can be turned into useful media products for playback by customers, partners, and employees.

SoniClear ClearScribe software makes it easy for court reporters to replace cassette tapes with modern digital recording technology. The simple user interface and features designed specifically for court reporters help assist in the production of accurate transcripts for clients while improving efficiency and profitability.

New SoniClear Features

Improved User Interface and File Handling

All of the SoniClear 5 versions include enhancements to the user interface and to file handling. The new Zoom playback location slider allows for fine control over positioning in long documents. Another user interface improvement is a new volume level meter that shows the signal is reaching the computer and that the record level is set correctly.

In the area of file handling, SoniClear 5 products now include the ability to import MP3 files, automatically converting to WAV format. In addition, the VoiceBoost audio enhancement feature can be applied to MP3 recordings to increase intelligibility. Files created on MP3 recorders can be processed using the transcribing, archiving and webcasting features of SoniClear Gov, Enterprise, and ClearScribe.

CD Publishing Features Enhanced

SoniClear Enterprise, ClearScribe, Gov Archiver and Gov Webcaster include improvements for archiving and publishing recordings to CD. Two new export formats have been added, Data CD and Tape. These are in addition to Audio CD and Archive CD formats available in SoniClear Release 4 products. The software automatically splits the file across multiple disks to accommodate recordings that exceed the media capacity. The new Pre-roll option overlaps the audio from one disk or tape to the next to ensure that words spoken at the point of the split are not lost.

Archive Management Improved

LAN archive management has been improved in several ways in Gov Archiver and Gov Webcaster. The Archive player makes it possible to store the entire LAN archive on CDROM. Up to 60 hours of meeting audio can be played from a single disk. The meeting selection and meeting agenda items are automatically displayed when the disk is inserted into a Windows computer.

Product Descriptions

SoniClear Gov

SoniClear Gov is a software-based digital recording system for recording, transcribing, archiving, and webcasting government meetings. SoniClear Gov also supports recording corporate board meetings and planning sessions that require the preparation of meeting minutes. SoniClear Gov is available in three versions that can be used in any combination, depending on application requirements.

SoniClear Gov Recorder creates high-quality digital recordings for permanent storage, with annotation, transcription and audio enhancement features. The software assists in the production of meeting minutes and makes it easy to recall any section of a meeting for research purposes. Gov Recorder replaces Release 4 of MeetingPro Assistant.

The price for Gov Recorder is \$295 per license.

SoniClear Gov Archiver is a new product for maintaining recording archives. Recordings can be stored and retrieved over a local area network for internal access. The software supports duplication of recording archives on compact disks (in audio and data formats), and on cassette tape. The archiving features are in addition to the recording, annotation and transcription features included in Gov Recorder.

Gov Archiver is priced at \$795 per license.

SoniClear Gov Webcaster makes it easy and affordable to webcast public meetings. The recordings can be played back on Windows, Macintosh and Unix computers using a web browser, making meetings universally accessible. Listeners can jump to any portion of the meeting, directly playing important points by selecting from a list of agenda items shown in the browser display. Gov Webcaster also includes all of the features of Gov Archiver and Gov Recorder. This new product replaces MeetingPro Gov, which also featured webcasting of meetings.

The price for Gov Webcaster is \$1495, with an introductory price of \$995 until July 31, 2005.

SoniClear Enterprise

SoniClear Enterprise is a new software product designed for digitally recording business meetings, conferences and seminars. SoniClear Enterprise makes it easy to publish professional-quality recordings for customers, partners, and employees. Recordings are automatically split into separate tracks and disks, and formatted for duplicating to Audio CD, two types of Data CD, and cassette tape. SoniClear Enterprise also includes annotation and transcription features to support efficient and accurate production of meeting minutes.

The price for SoniClear Enterprise is \$395 per license.

SoniClear ClearScribe

SoniClear ClearScribe is a new version of SoniClear, designed for court reporters who need to replace cassette tape with modern digital recording technology. In addition to providing enhanced digital audio quality, SoniClear makes it easy to annotate the recording to indicate events that occur in the court proceeding or deposition. These notes help improve accuracy and enhance efficiency when transcribing, allowing direct access to any point in the recording. ClearScribe features include annotation, transcription, audio enhancement.

For verbatim court reporters, ClearScribe includes support for using a stenomask. The two-channel recording mode provides optimal VoiceBoost audio enhancement, processing the mask and room microphones separately. During transcription, the court reporter can toggle between the mask and room channels. The two channels can also be split into separate files for archiving to CD, exporting to MP3 format, or for transfer to voice recognition software.

SoniClear ClearScribe is priced at \$495 per license.

SoniClear RecorderPro

The RecorderPro 5 product offers professional-quality digital recording that runs on any Windows computer. The simple user interface makes it easy to record meetings, PowerPoint voice tracks, lectures, dictation and other important verbal information with digital quality and convenience. The VoiceBoost audio enhancement makes for clearer audio when recording meetings and multimedia voice tracks. The software can import and export MP3 format files, converting to or from WAV format. The built-in recording level control and meter display makes it easy to set the record volume for optimum quality.

RecorderPro is priced at \$99 for the download Try-and-Buy version, or \$129 for a boxed product version.
